THANK YOU FOR YOUR SUPPORT!
Proceeds fund our local community outreach programs.
With your help over the past 4 years, we have distributed almost 2,000 seedlings to Lebanon County elementary school students.

QUESTIONS? Call Katie Doster at 717-277-5275 ext. 113
**BARE ROOT CONIFERS**

Sold in bundles of 10 (Juniper & Arborvitae sold individually in pots)

### BAR HARBOR JUNIPER

**Juniperus horizontalis ‘Bar Harbor’**

**AVAILABLE IN POTS ONLY**

**Description:** Commonly known as creeping juniper. Fast growing, evergreen shrub with blue-green foliage turning red-purple in winter. Versatile ground cover provides excellent use for rock gardens, foundations, retaining wall edges or on slopes for erosion control.

**Mature Height:** 1’  **Mature Spread:** 6-8’

**Growth Rate:** Slow - Medium

**Growing Conditions:** Adaptable to various soil types but prefers dry, sandy, well-drained soils in full sun. Tolerant of deer, drought, erosion, dry soil and shallow, rocky soil. Intolerant of wet soils.

### COLORADO BLUE SPRUCE

**Picea pungens glauca**

**Description:** One of the most popular ornamental conifers, silvery blue-green needles makes this tree a beautiful landscaping focal point. Tall conifer can be planted singularly or as a dense, colorful screen or windbreak.

*Note: Seedling colors may range from green to blue.*

**Mature Height:** 60-100’  **Mature Spread:** 20-30’

**Growth Rate:** Slow - Medium

**Growing Conditions:** Adaptable to various soil types. Prefers moderate soil moisture and full sun. Tolerant of flooding and drought.

### DOUGLAS FIR

**Pseudotsuga menziesii**

**Description:** Tall, pyramidal conifer with flat, dark green, fragrant needles. As tree matures, green cones turn to grey and dark brown-red bark turns to thick, brown bark. Seed source has been proven to be highly resistant to Gypsy Moth.

**Mature Height:** 40-80’  **Mature Spread:** 15-25’

**Growth Rate:** Medium

**Growing Conditions:** Prefers moist, well-drained soil. Partial to full sun. Intolerant of heavy, wet, clay soil and drought.

### EASTERN WHITE PINE

**Pinus strobus**

**NATIVE**

**Description:** Hardy, long-lived conifer with feathery blue-green needles, open canopy and straight trunk. Excellent ornamental tree can be planted singularly as a landscaping focal point, in groups for naturalizing or in rows as a dense, colorful screen or windbreak. Fast growing and easily transplanted.

**Mature Height:** 50-80’  **Mature Spread:** 20-40’

**Growth Rate:** Fast

**Growing Conditions:** Adaptable to various soil types and conditions but prefers moist, well-drained, sandy soils in partial to full sun. Tolerant of rabbit and deer browse.

### EMERALD GREEN ARBORVITAE

**Thuja occidentalis ‘Emerald Green’**

**AVAILABLE IN POTS ONLY**

**Description:** Compact, densely branched pyramidal form displays rich, shimmering emerald green color all year round. Easy to grow, dense foliage and disease resistance makes this variety a popular choice for windbreak or privacy screen.

**Mature Height:** 10-15’  **Mature Spread:** 3-4’

**Growth Rate:** Slow

**Growing Conditions:** Prefers moist, well-drained soil. Partial to full sun. Intolerant of full shade and flooding.

### NORWAY SPRUCE

**Picea abies**

**Description:** Dense conifer covered with long cones, dark green needles and reddish bark. Branches droop gracefully as tree matures, making it an attractive ornamental. Strong, fast growing tree makes it popular for windbreaks and reforesting areas.

**Mature Height:** 40-60’  **Mature Spread:** 25-30’

**Growth Rate:** Fast

**Growing Conditions:** Adaptable to various soil types. Prefers moderate soil moisture and full sun. Tolerant of flooding and drought.

### RED PINE

**Pinus resinosa**

**NATIVE**

**Description:** Large, long-lived evergreen with tall, straight trunk, dark green needles and beautiful reddish-brown, scaly bark. Excellent windbreak or privacy screen. Valuable timber tree.

**Mature Height:** 50-80’  **Mature Spread:** 15-25’  **Growth Rate:** Medium

**Growing Conditions:** Prefers moist, well-drained, sandy soils. Partial to full sun. Tolerant of drought. Intolerant of full shade.

---

**Growth Rates:** Slow = Less than 12’ per year  
Medium = 12-24’ per year  
Fast = Over 24’ per year
**MEADOWSWEET**  
_Speta latifolia_  
**NATIVE**

**Description:** Large, clump-forming, upright shrub producing white flower clusters in summer. Thrives near wet areas such as swamps, wet woods, streams and ponds. Commonly used as an herbal medicine. Flowers produce nectar and pollen, attracting birds, butterflies and bees.

**Mature Height:** 3-6’  
**Mature Spread:** 3-6’  
**Growth Rate:** Medium

**Growing Conditions:** Prefers consistently moist soil in full sun but can tolerate partial sun.

---

**PERSIMMON**  
_Diospyros virginiana_  
**NATIVE**

**Description:** Fragrant, white to green-yellow flowers bloom in late spring. Thick, dark green leaves turn yellow-orange in fall. Female tree produces small, bright orange, edible fruit in late autumn. Ripe fruit is deliciously sweet and may be consumed fresh or used to make syrup, jelly, ice cream or pie. Requires male and female plant to produce fruit. Due to plant immaturity, gender is unknown and cannot be requested.

**Mature Height:** 25-50’  
**Mature Spread:** 20-35’  
**Growth Rate:** Medium

**Growing Conditions:** Adaptable to wide range of soil conditions. Prefers moist, slightly acidic soil in full sun.

---

**RED MAPLE**  
_Acer rubrum_  
**NATIVE**

**Description:** Commonly known as Scarlet or Swamp Maple. Provides a pop of red in every season—bright red flowers in early spring, red stems and twigs in summer, brilliant orange-red foliage in fall and red buds in winter. An excellent wetland species as it can tolerate wet, swampy soil conditions.

**Mature Height:** 40-60’  
**Mature Spread:** 30-40’  
**Growth Rate:** Fast

**Growing Conditions:** Adaptable to various soil conditions. Prefers moist, acidic soils. Partial to full sun.

---

**RED OSIER DOGWOOD**  
_Cornus sericea_  
**NATIVE**

**Description:** Medium, ornamental shrub with dark green leaves turning red-purple in fall. Tiny, fragrant white flowers appear in late spring. Stunning fall color, attractive berries and vibrant red stems offers a focal point to any winter landscape. Hardy, versatile shrub is a favorite among gardeners, landscapers and homeowners.

**Mature Height:** 6-10’  
**Mature Spread:** 8-12’  
**Growth Rate:** Fast

**Growing Conditions:** Adaptable to various soil conditions. Prefers medium to wet, well-drained soils. Partial to full sun.

---

**SWEET BIRCH**  
_Betula lenta_  
**NATIVE**

**Description:** Aromatic, long-lived tree has shiny red-brown bark and rich, golden-yellow foliage in fall. Small, tan catkin flowers appear in spring before leaves unfurl. Excellent specimen tree commonly used for lawns and naturalized areas. Attracts various wildlife including birds and butterflies. Deer resistant.

**Mature Height:** 40-50’  
**Mature Spread:** 35-50’  
**Growth Rate:** Medium

**Growing Conditions:** Prefers moist, well-drained soils. Partial to full sun. Tolerant of wet soils, salt and poor drainage. Intolerant of drought.

---

**SWAMP WHITE OAK**  
_Corncus bicolor_  
**NATIVE**

**Description:** Low-lying oak with peeling bark and two-toned leaves showing dark, shiny green on top with silvery white on underside. Provides excellent shade for any landscape. Acorns attract wildlife.

**Mature Height:** 50-60’  
**Mature Spread:** 50-60’  
**Growth Rate:** Medium

**Growing Conditions:** Prefers moist, acidic soils in low-lying areas along creeks or swampy areas. Prefers full sun. Tolerant of drought.

---

**Growth Rates:**  
_Slow = Less than 12” per year_  
_Medium = 12-24” per year_  
_Fast = Over 24” per year_  

---

_Sold individually in 3” x 3” x 9” pots_

| **Mature Height:** 20-24”  
**Mature Spread:** 12-18” |
| **Bloom Time:** Early Summer - Early Fall |
| **Growing Conditions:** Prefers average soil conditions and partial to full sun. |
**APPLE**

**Crimson Gold**

**Description:** Sold individually. Medium sized, firm, crisp and juicy fruit bursting with robust, sweet and tart flavor. Long bloom period makes it an excellent pollinizer for other apple varieties. Very productive and has a storage life up to 8 months. Often used for fresh eating, cider, jelly and canning. Scab-resistant. Requires a compatible pollinator species, such as HoneyCrisp.

**Root Stock:** Bud 118 - Winter hardy, resistant to collar rot, adaptable to wide range of soil types.

**Mature Height:** 15-20'

**Ripening Date:** Mid - Late September

---

**HoneyCrisp**

**Description:** Sold individually. This popular variety is a crisp, juicy sweet-tart apple with rich flavor. Fruit averages 3 inches and stores well. Late blooming. Extreme winter hardiness. This cultivator provides a deeper, more intense red color than most HoneyCrisp apples. Requires a compatible pollinator species, such as Crimson Gold.

**Root Stock:** V1

**Mature Height:** 8-12'

**Ripening Date:** Mid - Late September

**Growing Conditions:** Prefers well-drained, loamy soil in full sun.

---

**BLUEBERRY**

**Bluecrop & Earlblue**

**Description:** Sold as a pair, one of each variety. **Bluecrop** produces vigorous and consistent light blue berries in large clusters. Firm and somewhat tart. High yielding and extremely hardy. **Earlblue** produces large, light blue berries, ripening uniformly in tight clusters. Resistant to cracking. Popular due to mild, sweet flavor. Grows upright and is cold tolerant.

Bluecrop and Earlblue are self-pollinating but yield better if pollinated together. Typically bear fruit within 2-3 years.

**Mature Height:** 4-6’

**Ripening Date:** June (Earlblue) & July (Bluecrop)

---

**PEACH**

**Loring**

**Description:** Sold individually. Large, firm, yellow-red freestone variety producing beautiful, pink blooms in spring. Considered one of the best fresh eating, canning and freezing varieties. Vigorous, productive and resistant to bacterial spot. Self-pollinating.

**Root Stock:** Lovell - Vigorous, more tolerant of wet soils, cold hardy.

**Mature Height:** 15-25’

**Ripening Date:** End August - Early September

**Growing Conditions:** Prefers well-drained, loamy soil in full sun.

---

**RED RASPBERRY**

**Latham**

**Description:** Sold as a pair. Large, firm, sweet and flavorful berries produces an abundant crop in mid-summer. Fruit is outstanding for fresh eating, freezing and canning. Winter hardy. Self-pollinating.

**Mature Height:** 4-5’

**Ripening Date:** Mid-July

**Growing Conditions:** Prefers well-drained, loamy soils. Partial to full sun. Intolerant of wet soils.

---

**STRAWBERRY**

**Seascape**

**Description:** Sold 10 per order. Ever bearing fruit produces large, sweet, red berries multiple times throughout spring, summer and fall. Produces high-yielding crop within 3 months after planting. If placed 18-24” apart, runners will form new plants and eventually form a solid bed. Heat tolerant and disease resistant.

**Mature Height:** 12”

**Mature Spread:** 2-3’

**Ripening Date:** Early April - End October

---

**FREE SPOTTED LANTERNFLY CIRCLE TRAP!**

Spotted Lanternfly (SLF) circle traps capture SLF nymphs and adults without using chemicals. The mesh fits tightly around the bark of the tree and funnels the SLF into a bag where they are unable to escape. Using circle traps from early June into late November may assist in decreasing the SLF population.

LCCD is offering a limited supply of SLF circle traps for Tree & Plant Sale customers. Priority will be given to orders as they are received. One circle trap per household while supplies last. If interested, check the box on the 2021 Tree & Plant Sale Order Form.
